***Response to Arguments***

Applicant's arguments contained in the amendment filed December 16, 2003, with respect to claims 15-39 have been fully considered and are persuasive.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Warner on February 3, 2004.

The application has been amended as follows:

Cancel claims 20-23.

***Allowable Subject Matter***

Claims 15-16, 19, and 24-39 are allowed.

The following is an examiner's statement of reasons for allowance:

As set forth in the previous Office action, the prior art fails to teach or suggest an electron optical system having a plurality of electrodes defining two sets of electrodes having rectangular apertures where the apertures of each set are arranged along an optical axis and the rectangular apertures have long sides such that the long side of the first set is perpendicular to the long side of the second set as recited in claims 15 and 19.

The prior art further fails to teach an electron optical system as set forth in claims 24, 25, 27, 33, 36, and 38 where a plurality of apertures are disposed on a plurality of adjacent electrodes and wherein a conductive shield is interposed between the adjacent electrodes.

Applicant's remarks regarding the Muraki et al. reference are found to be persuasive. The conductive and insulating layers in Muraki et al. lens array are for the purpose of applying a potential to a beam projected through the adjacent apertures of the electrode lens array or to insulate conductive members from one another. There is not a teaching or suggestion in Muraki et al. towards a conductive shield layer interposed between adjacent electrodes to shield electrodes from the field generated by said electrodes.

Claims 26, 28-32, 34-35, 37, and 39 depend on the aforementioned allowable claims and are therefore allowable by virtue of their dependency.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Examiner has provided on the form PTO-892 references considered relevant to the multi-electrode optical system claimed in the instant case.
